

01-05-C# HomeWork

Due By: 01/ 07/ 2017 12pm

Task

Create a **Winform** Application and a **Console** application that can do the following:(Find proper data types for the information you ask by yourself.)

1, Ask user for his or her First Name and Last Name, save separately.

2, Ask user for his or her age.

3, Ask user for his or her gender. (hint: radio button tool)

4, Check local time,

If the local time is after 6pm and before 8am, print out a greeting message like "Good Evening, Mr. Kong, Age 23."

otherwise, print message like "Good Day, Mrs. Xu, Age 18".

For Console Application, stop the screen and let users see the output.

For WinForm Application, the message should be popped out.

Grade Requirement

1, The project can compile and run correctly.

2, The program can ask users for input and read user's input

3, The program can print the message like the examples.
